Debugging Strategy

# Parcel delivery

Name: _____

Rule: check the name before picking up the box. Broken plan: deliver → walk → pick up → check name. Reorder it so every step can work.

Write 1–4 beside the steps.

☐ Hand over the box

☐ Go to the friend’s house

☐ Pick up the box

☐ Check the name on the box

**Think further**

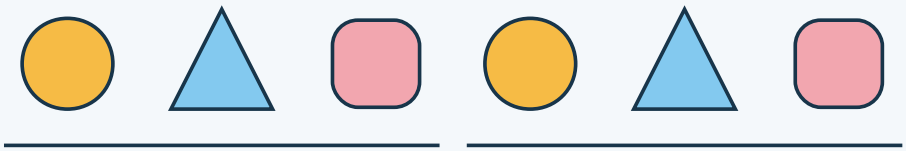

What could happen if the name is not checked?

Functions

# Call a bead recipe

Name: _____

The command “Three-shape set” makes circle → triangle → square. Two calls make this picture. What does one more call add?

“Three-shape set” called twice

Circle your choice.

☐ Circle • triangle • square

☐ Triangle • circle • square

☐ Square • triangle • circle

**Think further**

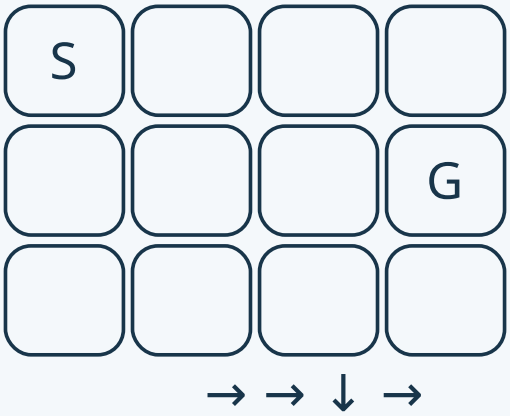

Draw two repeats of your own pattern.

Variables & Data

# Count delivery steps

Name: _____

The counter starts at 0. Each arrow adds 1. The robot follows → → ↓ → to G. What is the counter now?

Circle your choice.

☐ 4 steps

☐ 3 steps

☐ 5 steps

**Think further**

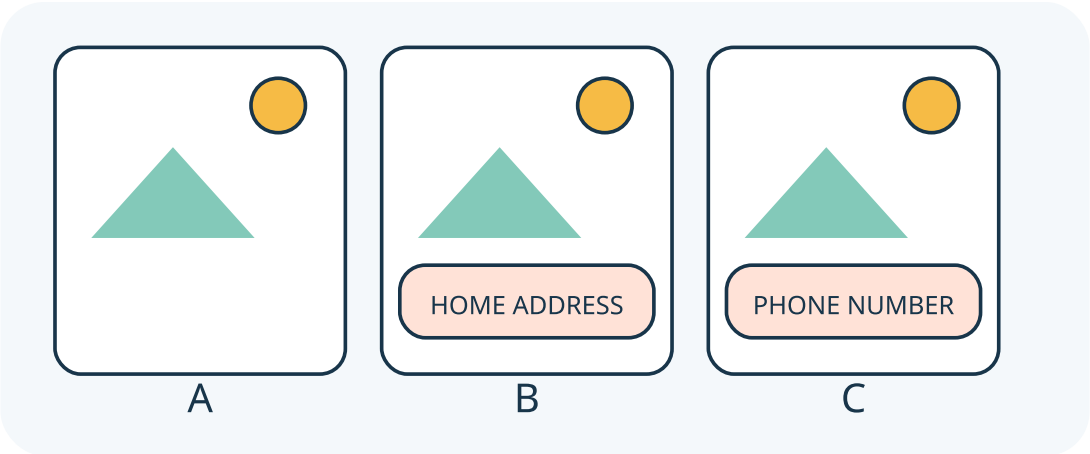

If the robot takes 2 more steps, what is the counter?

Digital Footprint + Cybersecurity Basics

# Which picture is safer to share?

Name: _____

You want to post your drawing publicly. Which picture avoids revealing private details?

Circle your choice.

☐ Only the drawing, with no identifying details

☐ Drawing with a home address

☐ Drawing with a phone number

**Think further**

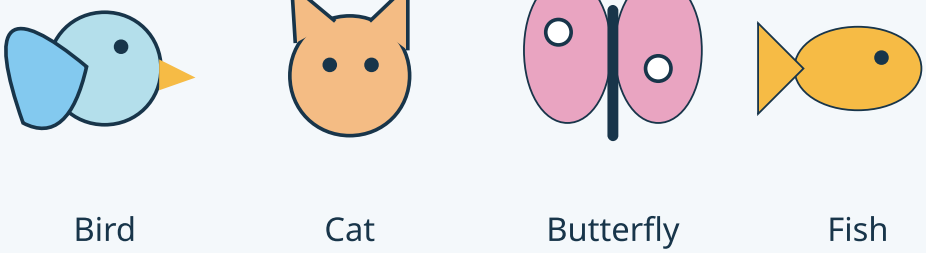

If a friend is in the photo, what should you do before sharing?

Nested Logic

# Robot animal gate

Name: _____

If it has wings: if the wings have spots → A, otherwise → B. If it has no wings → C. Use the drawings.

Bird Cat Butterfly Fish

Write A, B or C after each animal.

A Spotted wings • B Plain wings • C No wings

Bird: _____

Cat: _____

Butterfly: _____

Fish: _____

**Think further**

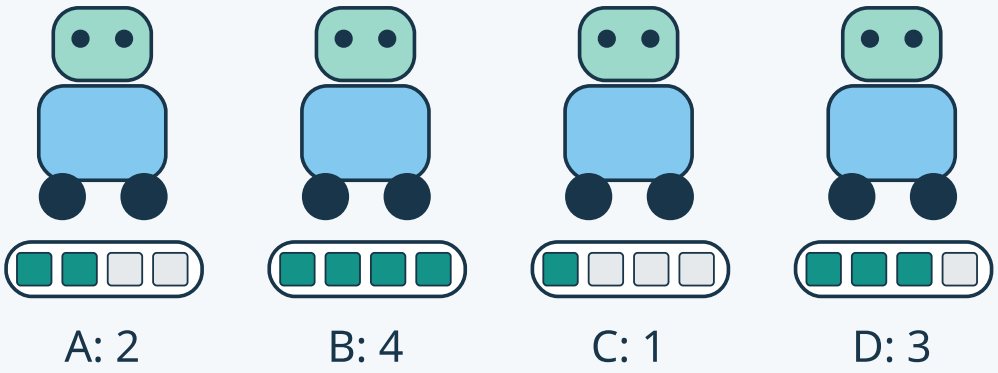

Draw an imaginary animal that can use gate A.

Variables & Data

# Which robots can deliver?

Name: _____

In this game, one delivery needs 3 energy units. A robot needs at least 3 units. Select every ready robot: A has 2, B has 4, C has 1, D has 3 units. These numbers are game rules, not real battery facts.

Tick all matching answers.

☐ A: 2 units

☐ B: 4 units

☐ C: 1 unit

☐ D: 3 units

**Think further**

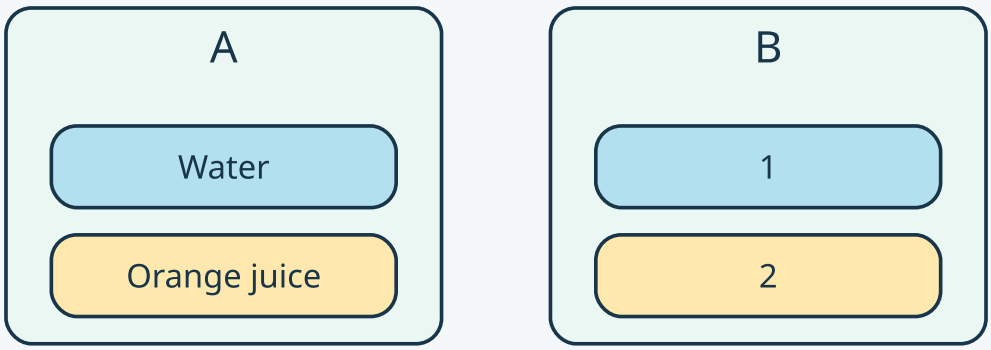

If A gains 1 energy unit, which robots are ready now?

Simple UI

# Drink machine

Name: _____

A first-time user wants water. Which design helps them choose without guessing?

Circle your choice.

☐ A: buttons labelled “Water” and “Orange juice”

☐ B: buttons labelled “1” and “2”

☐ Both give the same information

**Think further**

Draw a clear button for choosing milk.

Simple UI

# Did my order go through?

Name: _____

After tapping Order, what should the screen show to confirm the order?

Circle your choice.

☐ Rice order received • Queue 12

☐ Return home without a message

☐ Show only a star

**Think further**

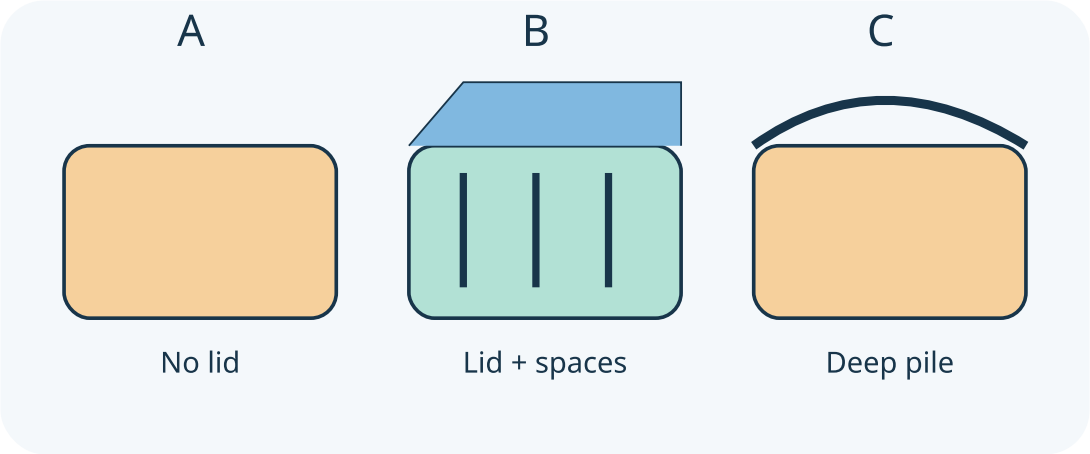

If the order fails, what should the screen say next?

Prototype & Test

# Min’s pencil box

Name: _____

Min tested the designs: A does not close, easy to reach; B closes, easy to reach; C closes, hard to reach. Min needs both. Which fits the test results?

Circle your choice.

☐ A Open tray, no lid

☐ B Box with lid and pencil spaces

☐ C Closing bag with a deep pile

**Think further**

Draw your own box to meet Min’s needs. Show it to a friend and ask, “What is unclear?” Choose one thing to improve.
